

DYNAMICS DOCUMENTS

Create Business Central Documents Without The Need For Code

Dynamics Documents gives you full control over your Business Central documents without the need for bespoke development.

It provides professionally designed layouts for all standard documents and allows you to easily customise headers, footers, fields, formatting, and presentation through simple configuration. This means you can adapt documents to meet branding, customer, or compliance requirements quickly—without raising development requests or incurring ongoing customisation costs.

Your Branding,
Your Data,
Your Layout

Build Your Own

Eliminates repeated document customisation requests

Reduce Custom Code

Reduces long term development and support costs

Future Proof

Makes it easy to respond to branding or compliance changes

Branding

Provides consistency across all standard Business Central documents

Documents laid out how you want without the need for development

Key Features

Modern Layouts

Access a full suite of pre designed, modern layouts for all standard Business Central documents — including invoices, orders, quotes, credit memos, and statements.

Easy to Configure

Easily tailor headers, footers, captions, fields, colours, and formatting through simple configuration screens.

Easy to Map Data

Choose which fields appear on your documents, pull values from related tables, and map data dynamically without modifying core reports.

Show and Hide Data

Show or hide fields such as bank details, location codes, contact information, or compliance text based on transaction type, country, or other conditions.

Copy Configuration

Create a configuration once and copy it across multiple document types or layouts, ensuring consistency while reducing setup time.

Select Date Formats

Select from predefined date formats or configure your own to match customer, regional, or audit requirements.

Why Choose Dynamic Cues?

Dynamics Documents are fully managed inside Business Central - all setup pages, formatting options, and configuration tools are built directly into Business Central for a seamless user experience.

Microsoft approved on AppSource

Configure from within Business Central

Future proof your documents with no custom code

Quick and Easy to install and setup

Part of the Dynamics App Suite

Dynamics Documents is part of the Dynamics Apps suite by Dynamics Consultants. These extensions enhance Microsoft Dynamics® 365 Business Central. Designed to streamline processes, boost productivity, and add valuable functionality, these apps integrate seamlessly into your system. With Dynamics Apps, Business Central becomes easier to use, more efficient, and better aligned with your business needs.
