"I like working at DC because of the positive culture of the company and the core values of the company. At DC, we are always encouraged to do the right thing which makes DC a great place to work". - Jagdeep Rattu

Our Culture

Dynamics Consultants is only as good as the amazing people who work for us and we do have some incredible people here! We are a dedicated, hardworking and fun-loving team of professionals specialising in the implementation, development and support of contemporary Microsoft business software solutions.

With over 300 years of collective experience, we're all about building partnerships for our future together. These extend throughout our business — to our customers, our suppliers, and of course, you! We're looking for bright, enthusiastic and ambitious individuals to further strengthen our experienced team.

Our History

When a Southampton based Microsoft partner closed down in the noughties, our directors spotted a gap in the market for high-quality services in Navision (which grew to become Dynamics NAV followed by Dynamics 365 Business Central). Jeremy and Tom both had an unusual mix of technical expertise and business acumen, which struck a chord with the businesses that they supported when the company formed in 2007.

Today, the company has grown to include a full support desk, development teams, a large and growing consultancy team, as well as a sales and marketing team. Identifying the need to bring "new blood" into the industry, we also have a strong program for apprentices and trainees, who are an invaluable asset to the work that we provide.

Our Vision and Values

"To be widely recognised as the UK's best Microsoft business software solutions partner".

Fair - Do what is right

Excellence - Strive to be the best

Cooperation - Helping & supporting as a team

Flexi-time

Generous Holiday Allowance

Staff Success Stories

Tom Harper

Utilising Core Skills in The Company

Tommy joined us as a Junior Developer and needing to build up his technical and business experience, he completed a Level 3 apprenticeship in IT and Telecomms. Then, he utilised his excellent customer service skills by joining our support team. Since then, he has worked in other departments, including admin, support, testing and finally he has become a key member of our consultancy team.

A Message From our Recruitment Team:

When an apprentice joins DC, they do so in the knowledge that they will be supported by many people within the company. This extends from their Line Manager, Buddy, Mentor and colleagues. Working within DC, all apprentices will be exposed to all areas of the business required to complete their apprenticeship modules and exams. In addition, they will have access to other departments to ensure that they complete their apprenticeship with a good overall knowledge of the working practices of an IT company and a business in general. We also provide a competitive package to all our apprentices.

How our Staff Feel

"Dynamics Consultants is a great place to work as they really make you feel like you matter, your voice matters. Everyone is involved in the improvement of the business, each having tasks that are outside their direct work which can make a real difference to how the business works and moves. There is also a clear focus on mentoring and progression of self. You feel heard and appreciated."

Miruna Rusu

From Junior to Solutions Architect

Miruna previously worked as an application developer for a manufacturing company. Joining us as a junior consultant and through a combination of technical expertise and a strong understanding of business processes, she helped with customer projects and created a number of our products. Miruna is now a Solutions Architect, managing key customers and large implementations.

How to Apply?

We are always looking to expand our team, please have a look on our website at any of the vacancies for more details. If you think you have something to add to our business outside of one of these roles, alternatively, please do contact us with your CV.
